| NI Kontrol S49 | Yamaha P-115 |
| NI Kontrol S61 | Yamaha S90X |
| NI Kontrol S88 | |

Instructions:

- OS X users: Open the Mac folder and run the installer .pkg.
- Windows users: Open the Windows folder and run the installer .exe.

Please do not move the folders. The installers rely on the folder hierarchy presented in the download to function properly. It is not necessary to open the STEAM folder.

NOTE: Please do NOT attempt to manually install the STEAM folder.

The installer automatically checks to see if you already have a Spectrasonics folder on your startup drive to determine the STEAM folder location. If you do not own any other Spectrasonics instruments, a Spectrasonics folder will be created. The files will then be installed to the STEAM folder.
